RHODODENDRONS.

After many years' experience in the propogation of these most desirable plants, we have tested a large number of varieties originating in Europe as to hardiness in this country, and with a select few of our own hybrids, all grafted plants, offer the following list of hardy kinds which represent also the most desirable colors; a longer list would only confuse the purchaser. It must be remembered that there is a diversity of growth among the varieties of the same age and price, and that it is impossible to execute orders for plants of a uniform height. If certain varieties from this list are sold out upon receipt of order, we will select others representing their color, unless otherwise instructed. Attention is called to the list of large, bushy plants which we offer at $150.00 per 100. The height does not represent their actual size.
